

Editor's Comment:

In reviewing the revised manuscript, the authors have addressed most of the reviewers' comments. However, I suggested two additional points to the authors for revision:

1. All the figures need to be referred to in the text. Besides, the second figure should have a figure caption and be labeled as "Fig. 2".
2. The references listed do not conform to the format suggested by the journal. Please list each reference according to author name, year, paper title, publisher, page number.

If the above corrections are properly taken care of, I will be willing to accept this paper for publication.
