

Editor's Comment:

In view of the reviewers' comments and the authors responses, the revised manuscript is much improved than before. However, there are three suggested additional comments to upgrade this paper to reach publishable standard:

1. Specific study objective should be included in the introduction section.
2. All equations should be numbered.
3. In Table 1, the mean values should be inserted in the heading rows instead of the last sub-heading rows.

If the above comments may be addressed, I agree to accept this paper for publication.
