

**Editor's Comment:**

The researcher didn't respond to any of the suggested corrections. The original manuscript and revised manuscript are simply the same. All the highlighted corrections by the reviewers still remain unaddressed in the submitted revised manuscript

In addition: There is nothing in the manuscript that gives any clue on the profitability of fish farming in this area, one of the researchers earlier mentioned the need for change or improve the analytical tool. The researcher may read **Dauda et al** (2017). Assessment of Fish Farming Practices, Operations, Water Resource Management and Profitability in Katsina State, Nigeria. *Journal of Northeast Agricultural University* (English Edition) 24 (4), 89-96.

Also on the constraints, the article below may be of help

**Dauda et al (2015)** Analysis of Constraints to Aquaculture Development in Sudano-Sahelian Region of Nigeria. *Tropical and Subtropical Agroecosystems*, 18 (2): 189 -193.
