

Editor's Comment:

Manuscript number: 2019/AJMAH/50627

Manuscript title: Attitude of Final Year Medical Students and House Officers to Otorhinolaryngology Surgery Training

Really the study is found to be needed one for the society. Good study and the author worked well and presented. Still I want to suggest the author to improve the writing, that is, I found that small small grammar error in the paper. When that is to be correct then only easy to understand.

So, I suggested that after the completion this minor corrections, the paper could be published in our journal.
