Editor's Comment:

The paper is a mini-review. IT has covered the mentioned topics but putting the techniques in the title is not apt. It is to be mentioned in the abstract.

WEKA is a tool and its API helps it to be called in other Programming Languages. It is not to be mentioned as a technique but as a tool. These inconsistencies in usage are to be corrected. In the text, some of the words are combined and these are to be edited. Further in one section, the authors have given a proposed methodology. Do they want to highlight their methodology in the review? If it is so, kindly outline the advantages over other techniques. If it is not the case kindly see to it that only one technique's methodology is highlighted.

Kindly address these inconsistencies and then the article can be accepted.
