

Editor's Comment:

Based on the recommendations of the reviewers, comments and revision by the authors, paper may be accepted for publication in BJI.

I just took a look of the paper. I found spelling/ grammatical mistakes:

For example- under Abstract- petri plats- should be petri plates.

Opening sentence of Introduction- A biotic stress factors such as salinity and drought are the main reasons- should be- Abiotic stress factors such as salinity and drought are the main reasons.

It will be good if editorial office Or authors go thru the manuscript and correct the language.
