

Editor's Comment:

The study titled "**Lifestyle impact on glycemic control in patients diagnosed with type 2 diabetes**" is an original and interesting study when the current information is scanned.

-When the study was examined in terms of the subject and content of the research, it was well designed and the hypothesis was established on solid foundations.

-In disease selection, a growing group of diseases has been selected that affects the majority of the world's population today.

-The language used in the study is simple and understandable.

-The method used is explained in detail in the material method section.

-References used in the study are current.

-In addition, the article has been revised in accordance with the comments of the reviewers.

Therefore, it can be accepted for publication.
