

Editor's Comment:

The manuscript is suitable for publication

The present manuscript could be located within the high-priority subjects of the Journal of Experimental Agriculture International and in agreement with the publication criteria of this one, the manuscript could be considered as a ARTICLE SCIENTIST, because their experimental results belong to the one of an investigation made in the field of applied sciences and is directed to a hearing in the agronomy area, with an approach of real application for the development of science and the technology and of the productive sector like is it the floriculture and agriculture sector.

By all this, I consider that this I articule can be published in a magazine of prestige as is it the H. Journal of Experimental Agriculture International.

Please consider minor observations before to accept or consider accept the changes in word. Please consider 4 or 5 references from JEA I and consider in resoult where do we can detect those resoult of 1st, 2nd and 3rd stage evaluated; please consider subtitles.
