

Editor's Comment:

I submit the paper for further corrections which were not carried by the authors.

Corrections:

Reference style: yet to be corrected

Adopt The Journal Reference style throughout.

Eg:

Numerous studies have been done about retrofitting columns against earthquakes either by traditional techniques (concrete jackets steel jackets) [1,2,3,4,5] or by confining with Fiber Reinforced Polymer fabrics (FRP)[6-12] S. Memon et al [6] 2005, tested eight specimens under axial compression loads and cyclic lateral displacements. The test results showed that ductility, shear and moment capacities was enhanced by retrofitting columns with GFRP wraps, also the cyclic behavior was improved with increase the number of GFRP layers. Stathis and Michael [7] 2003, presented an experimental study for retrofitting columns with.....

Reference style

References must be listed at the end of the manuscript and numbered in the order that they appear in the text. Every reference referred in the text must also present in the reference list and vice versa. In the text, citations should be indicated by the reference number in brackets [3].

Only published or accepted manuscripts should be included in the reference list. Articles submitted for publication, unpublished findings and personal communications should not be included in the reference list but may be mentioned in the text (e.g., T Nelson, Purdue University, USA, Unpublished results or personal communication). Avoid citing a "personal communication" unless it provides essential information not available from a public source, in which case the name of the person and date of communication should be cited in parentheses in the text. For scientific articles, obtain written permission and confirmation of accuracy from the source of a personal communication. An unpublished result which has been accepted for publication in any journal should be cited as "in press". Journal name abbreviations should be those found in the NCBI databases (Link: <http://www.ncbi.nlm.nih.gov/nlmcatalog/journals>).
