

**Editor's Comment:**

1. The topic or problem of issue is minor for research fields.
2. This manuscript is lack of research framework to present the thinking of writer. Therefore only use two questions to survey the results with descriptive method.
3. The scholar paper should follow the research process, such as the problem definition, literature review to support the author concerns, methodology choice, the contributions which can meet the management implication.

The whole content is not meet my basic criteria. Therefore I don't recommend to accept this manuscript.
