

**Editor's Comment:**

Paper is written in a very scientific manner. However, there are still typographic mistakes, kindly check the paper for it again.

Firstly, In Introduction section.... its not 'Euforbiaceace' family, please correct it (Euphorbiaceae).

Secondly, Author did not number the citation and arranged the references according to numbered citations, Although Reviewer 1 has asked the Author to work it out. So, Please remind Author to do it.

After all these corrections, paper is acceptable for publication.

I highly acknowledge the efforts of Editors, Reviewers and other team members for maintaining Journal's standards. keep it up.
