

SDI Review Form 1.6

Journal Name:	Asian Journal of Dental Sciences
Manuscript Number:	Ms_AJDS_47742
Title of the Manuscript:	Profiling origins and manifestations of dental fear and anxiety in children and adolescents: A content analysis of YouTube videos
Type of the Article	<u>Short Research Article</u>

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1) I would like to congratulate authors on a unique innovative and novel study. 2) I would like you to include the URLs of some useful videos, so that those videos can be used in dental offices prior to an invasive dental treatment, it would be beneficial for different dentists and dental institutions. 3) Statistical data has to be elaborated.	1) The links to all the videos have been provided 2) As the study was a content analysis and there was no statistical analysis per se. as all the videos were transcribed manually and the codes were derived subsequently.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	As the videos analysed were taken from the YouTube which is an open forum and the videos can be used freely so there no ethical issues as nothing of this was performed on the patients or dentists by the investigators.
