Manuscript Number:	Ms_AJFAR_51139
Title of the Manuscript:	Plankton Community Structure and Its Relationship with Minerals Profiles in Minapadi Area, Talagasari Village, Kadungora Garut Regency
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I have read very carefully and I found this is a good scientific manuscript. However, the abstract needs to be more informative and to the point. There is a need to update the introduction, more details about the methods, the results should be clear and to the point and the discussion must compare the results obtained with most recent and relevant work published recently.	I have to look for references as new as possible, but this research has not been done much before, so the citations are limited to old water quality books so they look less novelty. research on this minapadi is also mostly done by Indonesians so that reference journals are limited to regional journals. I hope that this little thing will not be a problem in the published publicity procedure, and I am sure that this journal is worth publishing
Minor REVISION comments	Please adhere to the journal guidelines.	done
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	No, I clearly understand that a code of ethics for publication is the norm that must be obeyed
