SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	-	
Minor REVISION comments	<p>The paper is interesting, but the text deserves an orthographic revision. Besides, these are some comments by section.</p> <p>INTRODUCTION Cite some reference to the definition of medicine used in the first paragraph;</p> <p>Justify, in the penultimate paragraph, the reasons for choosing the 4 questions mentioned (explain why these issues are relevant);</p> <p>Briefly describe how bibliometric analyzes are done. Also, explain, in general terms, what the terms x-index and h-index used in the last paragraph mean.</p> <p>MATERIALS AND METHODS 2.1 Data Sources Cite some reference of the used Microsoft Excel VBA modules;</p> <p>Is the quantity of articles resulting from process (156) sufficient to statistically validate the results obtained? Answer this question.</p> <p>2.2 The MeSH weighted scheme and the x-index used for quantifying citations The term MIF is used, but no description is given of the meaning of its acronym;</p> <p>Equation (1) has not been described.</p> <p>2.4 Social network analisys using Pajek software Put the title of the section in bold.</p>	<ol style="list-style-type: none"> 1. We have revised all context regarding the orthographic issues. 2. We have cited some essential references in the section of Introduction. 3. One sentence(Due to the citations representing the importance and eminence on an academic topic) has been added prior to the four questions. 4. A sentence has been added as below: We aim to apply x-index ($= \sqrt{\max_i(i \times c_i)}$), where i is the i-th publication in descending order of citations, and ci is the citation at the i-th publication)[14] that can effectively improve the h-index(\leqcitation at the i-th publication)[15] in bibliometric analyses[16,17] 5. Two references[20,21] has been cited in the paragraph. 6. Due to the limitation of articles with the terms of medicine and health in their title, we extracted 156 with the feature of journal article, the number of the inclusion for abstracts might be limit the generation of this study. The total items using all samples for big data analysis instead of the sampling ones using the inference statistics can be a worth-noting inference for a reference in the future. 7. We have added the equation (1) in Methods. <p>All subsections have been noted by the bold font.</p>
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
