

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Medicine and Health</a>
Manuscript Number:	Ms_AJMAH_50309
Title of the Manuscript:	Platelet Alteration in Plasmodium vivax Malaria Patients in Thailand
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		Not Applicable
<b>Minor</b> REVISION comments	Ms AJMAH 50309 some minor revisions are required, can the authors specify the reason for the delay occurred from the data collection and their publication? In such a prolonged period they could have integrated the data with observations on other hematological parameters and not only with the platelet count, making the study more complete. The presented study is extremely simplistic and does not bring important new features, except the observation of the data in the specified area. Even if scarce, there are some typing errors in the text	Thank you for your kind suggestion. We were allowed to perform a retrospective study and used only information, available in patient's records. According to the study design of this project, we tried to demonstrate our concept that role of platelet in patients who infected with vivax malaria. Further study, we are going to design a haematological study in all laboratory parameters and cover in all human malaria species. Thank you once again for your valuable suggestion, we will submit our proposal and complete our project as soon as possible. We are hoping that we will get some helpful findings for clinical managements in malaria patients.
<b>Optional/General</b> comments		Not Applicable

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	Not Applicable
