|-------------------------------------|--|---|
| Compulsory REVISION comments | <p>The present manuscript deals the haemolytic potential of ethanolic leaf extract of Talinum triangulare in Wistar rats. I hope the authors should refer the meaning of haemolysis. It is nothing but the lysis of RBC or cell wall rupture of RBC. It is a toxic symptom produced by some drugs and plant constituents like saponins. Hence, the title should be modified.</p> <p>In the materials and methods, authors stated that the material is extracted with methanol. It should be corrected.</p> <p>The manuscript was well written and presented in good manner. The methodology adopted is appropriate.</p> <p>If the title will be changed, it may be accepted.</p> | Thank you for this observation, it has been effected |
