PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author is STRONGLY advised to change the referencing style to Vancouver as per Journal Guidelines. Please see Website for details.	
Minor REVISION comments	Regarding the result tables, the author is advised to change the orientation of the table. Groups should be in columns while the analytes measured should be in rows. The author should also remove P1, P2 and the likes. Use superscripted letters and write the meaning at the end of the table. For example, 0.200 ± 0.01^a . remember, the table should ONLY contain the values of analytes calculated not their p values. The figures could be bigger and separated. The photomicrographs are unreadable and the legends unreadable.	
Optional/General comments	Minor grammatical and spacing could be corrected easily if the author reads the manuscript all over.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
