PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Well written manuscript, however it can be improved upon. 1. Insert a map , highlighting the study area 2. Table 1 and Figure 1 contain the same information. You have to delete one. So choose either the Table or the Chart. You cannot present the same data twice. 3. Review your list of references , most are very old. Ensure that you provide references in the last 5 years at least 80% of your references should be within the last five years. 4. What were your ETHICAL CONSIDERATIONS ? Did you obtain any ethical approvals from the appropriate committees prior to commencement of research? If yes, kindly state it in your manuscript and provide the approval number please.	Map not available and not required. Revised as per suggestion. Added as per suggestion. Not required, as it is not involving any experimental study on animal or human, It is just food safety work related to microbiology.
Minor REVISION comments		Revision completed.
Optional/General comments	Well written manuscript	ok

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> YES! There is a need to provide information on whether approvals were obtained from any ethical committee prior to this study. It is also important to mention if permission was sought from the owners of buffalos prior to sampling.	Not required, as it is not involving any experimental study on animal or human, It is just food safety work related to microbiology. Sample was collected with due consent from animal owners.
