

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_46989
Title of the Manuscript:	CHEMICAL COMPOSITION, NUTRITIONAL VALUES AND ANTIBACTERIAL ACTIVITIES OF WATER MELON SEED (<i>Citrullus lanatus</i>)
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors only have made some of the suggestions. The article still remains poor, since it is necessary to mention the practical importance of this article. Despite, the manuscript has some important results still needs many modifications. Statistical analysis missed in the materials and methods. Analysis of nutritional composition does not require such a detailed description, just mentioning which AOAC method followed. The discussion is poor, lack of comparison with other articles and English need to be improved.
