**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	I have read the manuscript and wish to state that the write up is highly technical in nature and can only be adequately comprehended by those in the field of medicine. Further more, the presentation of the methodology do not allow for a repeat of the research by another. Particularly, the method of analysis of the parameters were not clear ly detailed out. If the technical content is rendered in a manner that will encourage easy understanding by those not verse in the field and the methods of analysis detailed out, the entire write up is an educative one and so may be accepted for publication.	The manuscript has been modified
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
