PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I was not able to find the conclusion in the manuscript and which is the final suggestion. There was not appearing the CV in Anova table, which in my opinion is compulsory. Moreover, the author confuses the reader using in kg/ha and q/ha in the same paragraph for the yield.	The manuscript has been modified
Minor REVISION comments	I consider it is important to refer to the tables the coefficient of variation (CV %) for the best estimation of the work. The Latin names should be all of them in italics. Check the references and the gaps between the words.	
Optional/General comments
