PART 1: Review Comments

	Reviewers comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The article is indeed very interesting since describes the use of organoids as tools for diagnosis and therapeutics, particularly for blood cancer. However, the article is difficult to follow mainly for the writing style and organization of the manuscript. The edmanuscript should be re-structured and some paragraphs re-written.</p> <p>Formal English writing should be used in the article...for example....contractions like doesn't, won't,etc must be avoided</p> <ul style="list-style-type: none"> • While targeting cancer stem cells....please clarify this sentence in line 74 • Association with cancer diagnosis makes it difficult to treat. please clarify this sentence in line 80 <p>The greatest armory of these models is just not only to aid us to handle the metabolic changes [2], but also to help us to express the genes. As a consequence, Normal progenitor cells leading to repair and regeneration after the possible occurrence of damages. These paragraph should be re-written....its meaning it is not clear</p> <p>Table 01 should be organized under a different format....it is not clear what is showing. A title for the table should also be provided.</p> <p>Figures and diagrams should be better organized since they are difficult to follow</p>	The manuscript has been modified
Minor REVISION comments	MRI: Magnetic Resonance Imaging. The abbreviation should be defined previously in the text.
