**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This paper is not carefully executed and not clearly presented. The paper represents the study of ultrasound measurement of the abdominal aortic diameter in a normotensive and hypertensive adult nigerian population in Enugu. I would recommend to change the literature style to be more coherent. You should unify the style of figures, tables and references (Table 1,3; figures 4,6,7). Charts of figures should indicate standard deviation. I advise you to rewrite or edit the abstract, and unify the description for all tables, references and figures.	The manuscript has been modified
<b>Minor</b> REVISION comments	The table 3 is difficult to follow.	
<b>Optional/General</b> comments	none	

**PART 2:**
