	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	The manuscript " <b>Correlational analysis of Interleukin 6, Adiponectin and Lipid indices in women with Uterine Fibroids</b> " brings information about specific features from uterine fibroids patients in Nigeria. Their results are interesting and the data could have higher impact if obtained from a large number of patients. Despite of the manuscript value, the author needs to perform some improvement in the manuscript formatting and presentation. An additional table with literature data from inflammatory aspects of uterine fibroids could be useful. Additionally, I suggest that authors get together the items 2.3.1 and 2.3.2 in methods. You can use: Principles and methods of ELISA assays.	This has been looked into.  Merging might make this aspect appear prolix.
<b>Optional/General</b> comments
