Manuscript Number:	Ms_JCTI_48202
Title of the Manuscript:	Diagnostic significance of Beclin-1 and Transforming growth factor β (TGF- β) in Breast Cancer
Type of the Article	Original Research Papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Overall the manuscript has provided valuable data that will help improve cancer treatment; however, the authors need to revisit the manuscript to address a lot of typographical errors that are very rampant throughout the manuscript. Secondly, there are a lot of redundancies in the reporting of the results section; authors are advised to choose either table or figure (not both) in presenting the result. For instance, I would rather, prefer the results in table 2 be reported as was done in Figure 2.	Requirement of the reviewer was done
Optional/General comments	The authors are advised to engage native English speaker to read the manuscript and make edits as appropriate.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u> The study was approved by the Institutional Review Board (IRB) of the NCI, Cairo University and was conducted according to the rules of Helsinki declaration for human studies. A Written informed consent was obtained from all study subjects.	Requirement of the reviewer was done
