

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_48202
Title of the Manuscript:	Diagnostic significance of Beclin-1 and Transforming growth factor β (TGF- β) in Breast Cancer
New Title of the Manuscript:	Diagnostic significance of Beclin-1 and Transforming growth factor β in Breast Cancer
Type of Article:	Original Research Papers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The authors answered my comment on the novelty of the findings partly – also in tissue sections tumor cells and periphery can be evaluated.</p> <p>The text still does not differentiate between mRNA and protein expression in the discussion.</p> <p>ER, PR and HER sensitivity has still not been replaced and examples for misspelling like clinicopathological are also still present.</p>	<p>-The novelty of our work is to study association between beclin1 and TGF-β in vivo using breast cancer tissues from patients without any modification or treatment. Also it is first time to correlate these markers together in Egypt in breast carcinoma. We aimed to assess their levels in vivo using Egyptian breast cancers tissues and we found positive correlation as they tend to increase together.</p> <p>- Our design of the study was to assess m RNA of these markers and as you recommended protein levels of the studied parameter may be assessed in our future work and correlate them with their m RNA levels.</p> <p>-ER, PR and HER were illustrated below table 2 and the misspelling was corrected.</p>
