Title of the Manuscript:	Medullary thyroid carcinoma metastatic to the breast: Case report
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Good case study since only 0.5-1.5% found. Good for pathologist who find unusually cellular diagnosis.</p> <p>It may help to show any tumour markers tested. What is the status of this patient now after XX number of months?</p> <p>The article is publishable with revisions</p>	<p>Serum calcitonin level was not available. Other tumor markers as CEA, CA125, CA19-9 & AFP were insignificant.</p> <p>The patient died after 9 months from the diagnosis (this data is present in the manuscript).</p>
Minor REVISION comments	Misspelled words and other suggested changes in the yellow highlighted text	The English editing is checked.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
