PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Include explanation how the 12%-3% combination of the Supermagro biofertilizer and bovine urine resulted into better results. This could be through discussion of the characteristics of the chemical components.	An addition to explain the effects caused by a higher dose of these compounds was added, basically, when adding urine and the Supermagro in a higher concentration, more nutrients become available to the system.
Minor REVISION comments	There was no verification done on possible phytotoxic effects of the treatments.	We are sorry but we did not check for phytotoxic effects.
Optional/General comments		

PART 2:
