**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In the first round of review my comment was related to the sample dimension, that is, in my opinion, not sufficient to support the submitted analysis. I understand that authors do not have access to data to extend the sample, so I am sorry that my evaluation can not change.	This paper is based on preliminary dataset. Readers are requested to consider this paper as preliminary research article. Authors are aware that a bigger sample size is required to get a scientifically established interpretation. Readers are requested to use the conclusion of this paper judiciously as sample size is smaller. Authors also recommend bigger sample size for similar future studies.
