PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The text must be revised because there are several corrections, as indicated in the attached file. Figures and Tables must be placed in the text in a corrected place. There is no a statistical analysis, as ANOVA, for compare the averages. Some Tables and Figures repeated the same information.	I totally agree with the reviewer that Tables and Figures give the same information. Consequently, all the tables have been deleted. The figures are preferred for they give more information at a glance. Almost all the corrections pointed out by the Reviewer have been effected. I feel statistical analysis may not be necessary since the table of values have been deleted.
Minor REVISION comments		Compactibilizer in line 36 is correct.
Optional/General comments		The made valuable contributions to the quality of the paper that need t be appreciated. I will like to appreciate the reviewer for a job well done.

PART 2:
