PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript describes the case of a patient with obstructive sialadenitis in the submandibular gland caused by penetration of a fish bone, highlighting the importance of a precise inspection and examination of the gland, before any treatment. Overall, the paper is interesting, with discussion encompassing sufficient literature references, but it necessarily needs an English revision of the text, since the presence of numerous grammar errors and typos and, sometimes, lack of clarity. My comments and revisions are indicated in the text under track changes.	English has been corrected as per your comments
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
