

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_50051
Title of the Manuscript:	The Big Bang or the Conductivity of the Interstellar Space
Type of the Article	Research paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Authors should comment on modern observational techniques, such as modern interferometry, and their implication within the analysis performed in the paper.	The manuscript is based on the assumption that the measurements made have sufficient accuracy. It does not address measurement errors (technical or systematic). The text deals with the interpretation of measured results. The required analysis would require considerable effort. It's a good idea for a separate analysis and a separate manuscript.
Minor REVISION comments		
Optional/General comments	The paper analyses the phenomenological implications of singular cosmologies, i.e. of the cosmological singularity, with the matter content of the Universe.	No comment

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
