Compulsory REVISION comments	<ul style="list-style-type: none"> Very old references for the post-harvest losses of tomato in the introduction part. Please incorporate latest references. In results part, data has been stated on 0th, 7th and 21st day. In my opinion the data of 14th day should also be incorporated for the better analysis of the results. The gap of the analysis should have been more small rather than a week or more. Discussion of results seems insufficient. More references can be discussed to compare the results of the present study. Graphs can be additionally incorporated for the better presentation of the data.
