SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>Abstract: Lack of attention to efficient space and its qualitative elements has led to side effects such as lack of environmental visual qualities and its disorder and also lack of spaces efficiency (please rewrite it). It is very abstract. You are speaking about furniture and its impact on urban space. So directly using furniture and urban space two key words to write sentence. What is efficient space? It is very broad concept or the qualitative elements. "beautiful performance" , this is academic writing be careful about terms you use. Abstract should be very clear. You wrote it very abstract. What is "compatible with qualitative elements"? You have two major key words furniture and urban space use these two. "At other side, inefficiency of urban furniture emptied them from their aesthetic values and so-called these modern equipment which they should present more welfare facilities for citizens according to their ontological philosophy and create favorite urban spaces but they have been converted to most inefficient and polluting installed equipment at urban spaces." Avoid too long sentence. Re write it.</p> <p>Keywords: what is identity presentation element? just write identity.</p> <p>Introduction: you cant start sentence with maybe, but This is academic writing. "artificial environment" finds new term for that. Urban making "Science" ??? why science? Rewrite introduction. Avoid long sentence. Don't use many terms, focus on some key words and keep it for all part of paper. In introduction please write about methodology and objective of your study also clearly.</p> <p>The concept of urban space: Rewrite this "Urban space is organized structure based on following rules including: connection between body and urban elements and equipment, buildings and their similarities and differences and finally place of buildings, fountains and stations or other three dimensional elements." Avoid abstract. It is hard to understand what you mean? What is body and what is urban elements? Body is not urban elements? Rewrite please : So we can't account every building opening as urban building rather special visual communications and moving at space with mentioned features led to urban space. If not, open space will be account only as mass of buildings (Habibi, 1989).</p> <p>Physical elements of urban space: So, urban physics is a vessel which urban activities happen there. What is urban physics? I heard for first time. Seems that you use google translator. Please be careful about terms. Remove urban physics and replace it with appropriate term.</p> <p>Urban face: replace it with sth new. 1. Façade, capitalized letter. Remove bold" At summary, duties of guidance, control, security, relationship, facility, decoration and entertainment at street and city should be done by part of urban furniture."</p> <p>Change titles please "Worldwide thinking dominated on urban furniture"</p> <p>My overall suggestion: rewrite abstract, introduction and remove the concept of urban space. Just explain the role of furniture in urban space. And change title of paper to Studying the Effect of Urban Furniture on Urban Safety</p>	
<u>Minor</u> REVISION comments		

SDI Review Form 1.6

<u>Optional/General</u> comments	Introduction is most important part of paper. Clearly speak about literature you used to explain your data and write about data and method your used and also clearly say what is objective of this paper. Write two cohesive paragraphs. . In writing paragraphs should follow each other. Never jump from one concept to other concept. And please never write long sentences.
