**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Paper in present form can be rejected because 1) on the base of ms is mentioned that conclusion is based on the species definition, but the identification manuals are not relevant to the freshwater lake phytoplankton, only for marine/ 2) species were even not wright rightly, marked by yellow. Species and higher ranks taxonomy are placed under name Specie. 3) Methods of abundance calculation is not given. 4) It can be impossible to define mentioned species in Lugol fixator. 5) On the sampling map is not recognizable the studied lake. So, Basic information about species definition and calculation its abundance is not reliable and doubtful.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
