SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The study describes the retrospective analysis of tonsillectomy in adults. The study is well divided, aims are exposed clearly. Introduction brings a good overview. Results were well presented and discussed. I have just some minor suggestion.</p> <p>Was the study submitted /registered by the local ethic commission? This should be mentioned in "methods".</p> <p>You also excluded patients submitted to tonsillectomy due to tonsillar abscess, however, this is a common relative indication for surgery. Why did you exclude these patients? Please complete this information in the text.</p> <p>In the chapter " results" figure 2 is not necessary , as it repeats the same information given in the text.</p> <p>When you refer to follow-up, you don't mention the time frame of follow-up. As you mention diagnosis of carcinoma as follow-up, I wonder if this was the histologic result of the patients submitted to tonsillectomy due to suspicion of neoplasia, please explain.</p>	
Minor REVISION comments	none	
Optional/General comments	Nice report of the demographic characteristics of patients to tonsillectomy in Sokoto, Nigeria.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
