PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	It would be interesting to know the treatment in detail, since apparently it is the first time that a case with these characteristics is reported.	
Minor REVISION comments		
Optional/General comments	Minor revision. It is mentioned that all the studies were normal, normal clinical studies, viral studies normal, without signs of meningitis, but with absent Knee reflex bilareral and an equivocal planter response. That the treatment was physiotheray and ocupacional therapy. The antibiotics (wich) were discontinued.	

PART 2:

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
