Compulsory REVISION comments	The paper A 19-Years Period (2000-2018) Dataset of Annual and Monthly Spatial Distribution of Rainfall and Average Air Temperature in a Temperate Region for Climate Change Studies is interesting. However, it would be even better if the following issues are taken into account: 1. Page layout is incorrect and cramped 2. The paper does not sufficiently describe the methodology 3. Add more details on methods and materials are required and need the reference to the statistical processing of data. Several experiments (repetitions) and statistics of the results are not clear. 4.
