**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Excellent article, can be accepted for publication, we only suggest that some recent bibliography of the last two years be inserted in the area of statistics applied to rainy time series. The author does not present any statistical analysis of the behavior of this important climate variable, if possible it should insert in the article, as well as justifying why it used a historical series of only 18 years, since the FAO-UN recommends at least thirty years for temporary series of climate variables.	
<b>Minor</b> REVISION comments	Excellent article, I suggest the author justifies or can explain why he used a historical series of the size or length used in this article. Backed by the bibliographic reference.	
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
