PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The authors should provide scientific rather than logical interpretations of result. Similarly, the use of various project reports from similar institution may not be a true picture of the scenario. More so, statistical presentation of the results is poorly done and it should be seriously reconsidered.	
Optional/General comments	I have observed that almost 50% of the references were thesis reports. The author(s) should expand the literature search beyond this.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
