PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**An excellently written paper on the Meta-Heuristics Approach used for the Knapsack Problem In Memory Management. The paper is based on previous works and solutions so the idea is not completely innovative. The paper can be improved and a better analysis of the experiment can be given and explained.** **There is a lot of work in this area that has not been cited in the paper. It is suggested to include other references and increase the content of the literature review. There should be at least 10 more references in this work.** **Also kindly include limitations of the algorithm that is given. It is obvious that there are limitations to this working. These should be placed in the conclusion and clearly stated.** **Can the authors improve on the following statements:** "Experiments with simulated annealing showed that increase in number of processes gives better result than the Genetic Algorithm" Can the authors explain why this is so in their conclusion ? **Kindly reformat the paper and improve your**
