**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>*longitude 10°N and 15°N and latitude 5°E and 10°E. it should be verified with geographical parameters, additionally it should be written scientific.</p> <p>* Kjeldahl technique , this method needs to be explained a little more. Because main technique of the study should be detailed.</p> <p>* Beetle (<i>Melolantha spp.</i>) Which insect species?</p> <p>* 'However, Omotoso (2006) indicated that fibre was not detected. ' how and where was Omotoso detected? It has been unreasonable.</p>	
<b>Minor</b> REVISION comments	<p>*Exemplia gracia : <i>Gryllotapha Africana</i>, that is, first word should start with upper letter, second word use low letter at species nominal culture , <i>Gryllotapha africana</i></p> <p>*Moreover, latin names of species should have properly and completely researched from internet and other resources, E.g., , <i>Clariaslazera spp.</i>). if necessary, assistant may be taken from an ichtiolog master. Which fish species?</p> <p>* protein, fat ...etc are not special words.</p> <p>* tables have not been uprightly and vertically arranged.</p>	
<b>Optional/General</b> comments	<p>*'This suggested that insects as diet when taken in required amount can meet up with protein requirements of human body and can therefore supplement animal meats in our diets.' These senteces shold be adjusted , it should have focused if meet up to human or animal feeding, I did not clearly understand how to requirements it.</p>
