PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	When reviewing scientific papers for publication, I usually start with a general overview in terms of a structure, abstract, literature review, methodology, findings of the research, discussion, conclusions, as well as limitations of the study. The research in this paper is worthy of affirmation. The entry point of this article is very attractive. It is very necessary to study the great ancient civilization. To improve the quality of the work I would recommend: 1. Specific description of the research process 2. There are quite a few points that this article wants to explore, but the conclusion does not seem to converge the research results very well. 3. Expand the information about the research limitations.	
Minor REVISION comments		
Optional/General comments
