PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1) The sieve can be very useful in determining which prime numbers end with a certain digit. 2) The author should comment or establish criteria for the reduction of the computational costs involved, since it is not clear which is the criterion of stop and what are the dimensions of the tables created with composite numbers. 3) It is recommended that the author follow the template of the journal if the article is accepted.	
Minor REVISION comments		
Optional/General comments
