

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_45445
Title of the Manuscript:	Molecular characterization and prevalence of antibiotic resistance in Escherichia coli isolated from raw goat milk
New title:	Isolation, incidence and molecular characterization of drug-resistant <i>Escherichia coli</i> of goat milk
Type of Article:	Original Research Papers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The authors have responded favourably to most of the review comments raised. The following are however still pending;</p> <ol style="list-style-type: none"> 1. What informed the choice of tested antibiotics? 2. The resistance rates to antibiotics are quite high, imipenem (70.8%) etc, what experimental control was put in place to ensure the efficacy of the tested antibiotics? 3. The authors stated in respect of <u>ethical issues</u> that milk samples were collected from sellers and not directly from animals.... This is contradictory to statement under 'sample collection' which is, 'A total of 250 raw milk samples were taken from healthy goats from different farms at Taif province'
