

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_45425
Title of the Manuscript:	Effect of land use on soil quality in afaka forest northern guinea savannah of Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>It appears author/s is/are in a hurry to have article published and therefore ignored the comments and queries in the reviewed manuscript. I called for the review to encourage the author/s. I have attached the reviewed manuscript rather than do another review. For example, they have not shown explicitly how the sampling for aggregate analysis was done and how the laboratory analysis was carried out. There are specific queries on these. Rather than report mean weight diameter, dry (MWDd) and wet (MWDw), the report is on aggregate-size fractions; the title of the table is MWD. Even after all is done, the author/s or the editor will employ a grammarian to edit the article. Authors should learn to seek the support of such experts to assist. Please, unless the author/s thoroughly read and make the corrections suggested and the queries which are intended to improve the quality of the article, the editor may seek the assistance of other reviewers.</p>
