PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Please rephrase the title of the research from "A comparative Evaluation Of Selected Medicinal Plants For Possible Use As Male Anti Infertility Agents. An Animal Case Study" to " A comparative Evaluation Of Selected Medicinal Plants on Male fertility indices (reproductive hormones and sperm profile) of albino wistar rats. An Animal Case study".</p> <p>In line 18, the authors wrote that 90 animals were used for this study, and the animals were selected into 11 groups of 6males and 4 females rats per group, I wish to ask if fthe 90 animals acquired for the study were both sexes and why use female rats when the study was intended to examine male fertility parameters.</p> <p>What dose of ketoconazole was used in this study to induce infertility, please the authors should clarify that in the methodology section.</p> <p>In the results and discussion section, the authors should present results separately from the discussion. Discussion of the results should be written citing appropriate similar researches that has been done in the area of male fertility and some medicinal seeds. Authors should revise the conclusion and incorporate the effect of Velvet bean and Beniseed on male fertility parameters.</p> <p>More references should be added when discussing results, list of references too small.</p>	
Minor REVISION comments	<p>Rephrase the sentence in Line 26 that reads "From the research".....</p> <p>In line 83, Instead of using the word "Infected groups" please consider using "Infertility Induced groups" for the experimental groups.</p> <p>Authors should be consistent in the correct spellings of "Testes" and "Epididymides" in lines 24,100,109.</p>	
Optional/General comments
