SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	**Ms_JAMCS_50124**
Title of the Manuscript:	**Modelling the effect of Hartmann Number on Transient period, Viscous dissipation and Joule heating in a Transient MHD flow over a flat plate moving at a constant velocity**
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**1) I have done some indications for corrections along the text. They are marked for acceptation.** **2) Put the correspondent units of the variables at the Nomenclature** **3) I have done corrections at the Equations. The Eq. (4) is corrected only for $t_0 = L^2 / \nu$. So, the definition of the Hartmann number presented by the authors is wrong. The correct definition must be $H^2 = \frac{\sigma B^2 L^2}{\mu}$ as written by me at Eq. (3). The correct Eq. (4) should be: $\frac{\partial u^*}{\partial t^*} = \frac{\partial^2 u^*}{\partial y^{*2}} - t_0 \sigma \frac{B^2 u^*}{\rho}$.** **4) The Legends at Figures 3 and 4 is really H? Because H is the abscissa axis. The curves must be for some other fixed parameter. What is this parameter?**	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
