PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | This study explored the association between gross hematuria, serum PSA levels and Gleason score in prostate cancer patients. Though interesting, introduction does not include sufficient elements characterizing background (e.g. description of Gleason score, TURP, etc.), while discussion is often unclear. I recommend an extensive English revision, considering also my comments highlighted in the text in track changes mode. | |
| Minor REVISION comments | | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
