PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>(i) The researcher must number the various sections of the research whereby Introduction must be 1. and the Literature Review 2. and so on.</p> <p>(ii) The heading “ Needs and Significance of the Study” should be revised to become “ Significance of the Study” that is “ Needs and” should be dropped because the significance of the study explains how the study is needed any way.</p> <p>(iii) The Methodology is too shallow. The researcher should say more on the quantitative method to be used and on the cross- sectional research design to be used given that readers will be interested to know them.</p> <p>(iv) Conclusion and Recommendations must be in capital letters for consistency with other headings. In addition, the researcher must separate the two. Furthermore, the researcher should provide more that the one recommendation provided given that more results have been outlined.</p>	
<u>Minor</u> REVISION comments	<p>(i). The table should be numbered as table 1, and not table 1.1 which might suggest that the first number is linked to a section.</p>
